1. Please comment on the strengths of any aspect of this course (e.g., the lecture, recitation, laboratory, computing, text, homeworks, examinations or course content).

158656: Lectures, recitations, homework were all helpful in learning the material and were carried out effectively. Exams were fair (perhaps slightly easy).

158699: The professor was excellent during lectures and made concepts very easy to understand. The homeworks were challenging but very helpful.

159253: Lecture and lab were organized and instructor and TAs were very helpful.

159385: Lectures are interesting and clear, course is well structured, homework is fair

159821: The lecturer and both TA's are super intelligent and helpful. The course material is interesting and challenging.

160716: The TA's and professor were really helpful, nice, and easy to approach.

161211: Instructor/TAs extremely willing to help. Labs and homeworks really ensure one's understanding of the class material.

161506: The office hours were really helpful and the homework really helped me to learn the material.

162135: Really helpful Ta's.

162612: Lectures were very clear, unlike most courses this semester.

164691: V. GOOD. TAs and Teacher is very good!

166760: Everything was awesome. best professor I've had while at cornell. tas were great too

167355: Interesting course. Made me decided to change majors in the subject of the course.

167372: This course was fantastic. Frans is an amazing professor and presents the information in a clear way that has sparked a strong interest in Operations Research. The labs were very helpful in reinforcing the class material (although occasionally they were lengthy). Overall, this was amazing.

167904: The lectures were very clear and well organized.

2. Please comment on the weaknesses of any aspect of this course (e.g., the lecture, recitation, laboratory, computing, text, homeworks, examinations or course content).

158656: N/A

158699: None

159154: labs are boring

159253: I wish we had gone more in depth with some of the material, or covered more material.

159385: none!

159821: No weakness as far as I could tell.

160716: The homework was unclear at times.

161211: Need more office hours or office hours at night instead because they conflict with a lot of people's class times

161506: Maybe if anything, the text was written in a confusing way, so it was really hard for me to read before learning in lecture (to get myself familiar with it) because it used so much notation i hadn't learned before it was presented in class. I think if it was written in a slightly less-elevated text, then it would be better.

162135: Homework's are graded pretty harshly.

162612: Not obvious grading policies. For example, what does participation, which counts for 20% of our grade account for?

167355: Homeworks were graded pretty tough. You would not get a good grade if you did not go to office hours which were held several days before the homework was due so you always had to start the problem sets very early. TA's were not good about getting homework/labs back in a timely fashion nor were they good at responding to emails promptly.

167372: None

167904: I found that the text was a little confusing. Sometimes I wished the text more explanations or examples of what he covered in lecture.
